

Abdulrehman Khan

Software Engineer

Lahore press club housing scheme , Pakistan • Abdulrehmankhan1010589@gmail.com • + 92 3071010589

OBJECTIVE

Seeking a challenging position in a progressive firm for which I can contribute to its growth while further developing my technical and managerial skills. Applying my professional competence and hardworking behavior in a growing, dynamic reputable organization where my knowledge and experience can be applied to potential.

SKILLS

- FrontEnd : HTML5, CSS3, Tailwind, JavaScript, Blade, Livewire, React.js
- Backend : SQL, PHP, Laravel, Filament, Python, FastAPI, APIs
- Databases : MySQL, Postgres, Query Optimization
- Version Control System : Git, GitHub
- API integrations : Stripe, OAuth
- Deployment : Docker, Cpanel, VPS

EXPERIENCE

Worked as a Full Stack Developer in a collaborative and fast-paced environment, contributing to the development of several high-quality web applications. Collaborated with a skilled team of developers, designers, and project managers to deliver production-ready software using modern development stacks.

- Gained strong experience in **team collaboration**, **agile workflows**, and **code reviews**, enhancing my ability to work effectively in cross-functional teams.
- Practiced **discipline**, **consistency**, and **hard work** to meet project deadlines and maintain code quality.
- Continuously learned and adopted best practices in **software architecture**, **version control (Git)**, and **CI/CD pipelines**.
- Contributed to both frontend and backend tasks with a strong focus on **scalability**, **performance optimization**, and **user experience**.

PROJECTS

UHS (University of Health Sciences) Web Application

Technologies: Laravel, Livewire, Filament

Team Size: 4 Developers

Role: Full Stack Developer

- Developed a web-based admission portal for UHS to streamline the student application process for the 2023 intake.
- Enabled students to register, fill out, and edit their applications through a secure, user-friendly interface.
- Utilized **Laravel** for backend logic, **Livewire** for dynamic frontend behavior, and **Filament** for building an intuitive admin dashboard.
- Collaborated closely with fellow developers under the guidance of a Team Lead to ensure timely and scalable delivery.

NexGen CC – Customer Support Ticketing System

Technologies: Laravel, MySQL, ProxySQL, Next.js, Python

Role: Lead Developer

- Designed and implemented a customer support system allowing managers and agents to manage queries in

real-time.

- Integrated email-based ticket creation and updates using cron jobs to fetch and sync emails into threaded conversations automatically.
- Built a **SaaS-ready** architecture with dynamic role-based access controls and permission management via a powerful admin panel.
- Ensured seamless communication across support staff through internal messaging tied to each customer ticket.

Phone Number Dialer for Call Centers

Technologies: Laravel, ProxySQL, MySQL

Role: Backend Developer

- Developed a high-perfor
- Implemented **ProxySQL** for connection pooling to prevent table locks and maintain API responsiveness during peak usage.
- Focused on performance optimization and system stability in high-load environments.

EDUCATION

BACHELOR'S IN INFORMATION TECHNOLOGY 2019-2023

- *Pucit(Punjab university college of information technology)* mance call center dialer application capable of handling large volumes of API requests concurrently.

INTERMEDIATE 2017-2019

Punjab college
